**A Practical Orientation for Infants and Children**  
*Chapin, C. M. (Ed.), 1980-01-01*  
Prepared by Dr. Mary J. Judson, a Consulting Editor, this book emphasizes the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for patients with cancer. The book offers a valuable and practical resource for students and clinicians across all settings of care. The book provides a comprehensive overview of palliative care for infants and children, including pharmacologic and non-pharmacologic interventions, assessment and management of pain and other symptoms, end-of-life care, and ethical considerations. The authors discuss the importance of acknowledging the psychological and social impact of illness on children and their families, and provide guidance on how to address these issues effectively.

**Pediatric Palliative Care**  
*Kaye, M. (Ed.), 2015-01-01*  
As the number and types of pediatric transplants increase and the complexity of chemotherapy regimens continues to evolve, there is a greater need for authoritative guidance on the treatment of pediatric patients with cancer. This book provides a comprehensive overview of the latest advances in pediatric palliative care, including pain management, symptom control, and end-of-life care. The authors discuss the importance of considering the whole child and family, and provide guidance on how to incorporate palliative care into routine care. The book is an important resource for pediatric oncologists, nurses, and other healthcare providers who care for children with cancer.
